MODELS: All
1966 Polara,
Monaco and
Monaco 500
Equipped with
383 or 440 Cu.
In. Engine and
Air Conditioning

P-5428-C

Two different radiator inlet hoses are used in current production on Polara, Monaco and Monaco 500 cars equipped with air conditioning, because of radiator size differences.

A 22" radiator is used with the 383 cu. in. engine when the car is not also equipped with the Cleaner Air Package and/or Trailer Towing Package. Radiator inlet hoses 2465771 should be used on these cars.

All 383 engine cars equipped with air conditioning and Cleaner Air Package or the Towing Package and all 440 cu. in. engine cars with air conditioning use 26" radiators and inlet hose 2532702.

Some early production cars may have an incorrect hose. When the 2465771 hose is used on the 26" radiators belt clearance is so small that a whipping belt may cut the inlet hose causing a loss of coolant.

Please inspect the following cars to make sure they have the 2532702 hose (part number is stamped on hose):

All Polara, Monaco and Monaco 500 cars equipped with 383 cu. in. engine, air conditioning, Cleaner Air Package or Trailer Towing Package, and all 440 cu. in. engine air conditioned cars with or without Cleaner Air Package or Trailer Towing Package.

CAUTION: FLEXIBLE SERVICE HOSES ARE NOT SATISFACTORY FOR THIS APPLICATION.

COOLING

190° Thermostat

A 190° engine cooling system thermostat has been released for passenger car use and is available from MoPar.

The new thermostat provides a means for additional heater capacity for those northern geographic areas where extremely cold temperatures can occur.

The part number of the 190° thermostat for all 6 cylinder slant six (6) engines, 1960 through 1966, is 2843210. The part number for all V-8 engines, 1960 through 1966, is 2843209.

Caution: The use of the 190° thermostat is not recommended for trucks.
